

# WHAT IS YOUR RISK FOR HIV?

People of *any age, race, gender, or sexual orientation* can be infected with HIV.

## YOUR RISK FOR HIV IS HIGHER

if you have **unprotected anal, oral, or vaginal sex**, especially with multiple partners or with a partner that is HIV-positive.

## YOUR RISK FOR HIV IS HIGHER

if you have been diagnosed with hepatitis, tuberculosis (TB), or a **sexually transmitted disease**.

## YOUR RISK FOR HIV IS HIGHER

if you **share needles or syringes** during intravenous drug use.

If you engage in these risky behaviors, you should consider getting **tested!**
